

Arcules Video Cloud IoT as a Service

Transforming Video Data into Powerful Intelligence

Arcules is an innovation-driven company committed to providing you with a pure-play, cloud-first solution to optimize your business and make the world a safer place.

The Arcules Intelligent Video Platform

Our solution is built from the ground up and integrates the latest technologies in cloud, Internet of Things (IoT), Artificial Intelligence, (AI) and machine learning.

The Arcules Difference

One Unified Platform

Central management and monitoring of the entire solution in the cloud – devices and cameras
Site to cloud bandwidth management
Straightforward migration from on-premise to cloud
Site to cloud – full SSL, AES 256 bit encryption at rest in the cloud

Simplified User Experience

Fast and easy setup, scalability and surveillance
Able to scale across geographically dispersed sites
Reduced operations – no servers requiring manual updates or maintenance
Straightforward migration from on-premise to cloud
Web, Windows and iOS and Android clients available
Enhanced contextual user experience

Privacy & Security

Site to cloud – full SSL, AES 256 bit encryption at rest in the cloud
EU cloud Code of Conduct Member to ensure GDPR compliance
Proactive vulnerability monitoring for potential breaches with real-time alerts
Cloud audit, activity & privacy logs

Intelligence & Integrations

Enabled for smart technologies, devices, software and more
AI and machine learning engine to introduce analytics across the enterprise
Support an array of cameras including ONVIF
Sensor data ingestion from multiple to IoT platforms (Crestron, BrightSign)
Intelligent prevention for real-time alerts
