

Arcules Integrated Video Surveillance Solution

Simpler. Smarter. More Connected.

Today's Situation

The Arcules Integrated Video Surveillance solution offers businesses the ability to operate as a modern enterprise. For many businesses overseeing multi-site locations, managing locations spread across multiple geographies has meant having:

- Site-specific hardware and software
- Siloed video data
- Costly and time-consuming server maintenance
- Multiple layers of passwords and networks
- Delayed access to video and other data in emergencies

Arcules Integrated Video Surveillance

The Arcules cloud-based service is built from the ground up with the latest technologies in cloud, Internet of Things (IoT), Artificial Intelligence (AI) and machine learning. Through a unified platform, Arcules delivers to modern businesses:

- Centralized management and monitoring from your web or mobile app, to look across your organization and geographic locations
- Lower initial investment compared to on-premise solutions
- Decrease in overall maintenance costs
- Adaptability and scalability to grow with your business
- Increased security at every data point
- Intelligence and analytics to proactively reduce risks and improve business operations

Arcules' Integrated Video Surveillance solution allows modern enterprises to operate simpler, smarter and more connected.

The Arcules Difference

One Unified, All Inclusive Platform delivers enhanced security, streamlined operations, and actionable business intelligence and insights.

Centralized Monitoring and Management

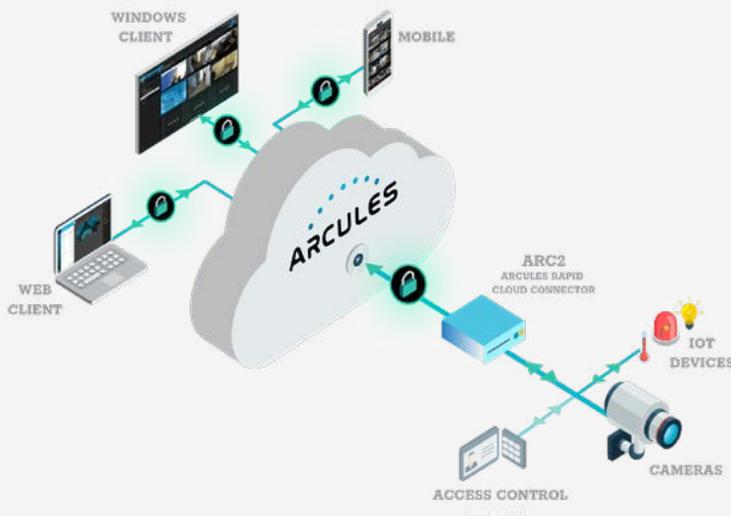

- View all site locations from web or mobile device, for anywhere, at any time
- Remotely schedule software updates and security fixes reducing the cost and burden on your IT staff
- Automatic monitoring of the health of your cameras and gateway
- Create and manage users, rules, alarms and notifications so you can operate efficiently and respond proactively to events

Enhanced Security, Scalability, and Storage

- The Gateway, equipped with ARC² software, securely pushes local data to the cloud, encrypted in transit and at rest. ARC² also auto discovers new cameras
- Easily migrate from on-premise to cloud as your business needs grow and evolve, even across geographies
- Continuous video recording even during an Internet connection loss
- Enjoy low latency, speed and accessibility

Business Intelligence and Next Generation Analytics

- Built with the latest Artificial Intelligence and Machine Learning technologies to deliver analytics across your organization
- Utilizing heat maps and people-counting features, gather insights to prevent loss, reduce risks, and improve operations
- Enabled for smart technologies, devices, software and more to deliver more intelligent analytics and insights over time

****ARC² appliance supports up to 30 channels. An ARC² appliance is required for each site.**

Arcules Rapid Cloud Connector (ARC²)

ARC² transforms a simple appliance into a unique connector that securely pushes your local data to the cloud – at a cost that's just a fraction of on-premise systems. With ARC², you can:

- Easily plug the appliance into your network
- Save time, as the latest software is automatically updated
- Quickly set up cameras with ARC²'s autodiscover feature
- View local data, manage bandwidth, and secure any data sent to the cloud
- Know your data is secure: ARC² encrypts data that is uploaded to the cloud
- Enjoy minimal IT involvement
